

**NO TO ANIMAL EXPERIMENTS  
YES TO MODERN AND WELL-WORKING TEST METHODS  
FOR CHEMICAL PRODUCTS**

**As a consequence of the REACH project (registration, evaluation, authorisation of chemicals), the European Union must re-test 30,000 chemical products. As no species can scientifically be used as the biological model for another, we ask, together with many European researchers, for ethical, sanitary and environmental reasons, the end of experiments on animals (obsolete tests sometimes dating back from the 19<sup>th</sup> Century) and the promotion of methods resulting from progress in biology and in particular from molecular toxicology (reliable, reproducible and economical tests).**

*(Please write legibly and in capital letters. The data sets are necessary for the petition to be valid. Thanks!)*
